stellar style in recycled glass tile

Based in Portland, Oregon, Stardust Glass focuses on the creative and artistic elements of tile making.

Our artisan tiles are handcrafted using 87-97% recycled glass, produced using eco-friendly manufacturing practices. Our tiles have a translucent 3-D quality not found in traditional ceramic tile. Stardust Glass tiles are not machine-pressed, so each one is unique from one another, giving a more personalized look and style.

We are dedicated to reducing our environmental impact through use of recycled pre-consumer scrap glass, typically headed for the landfill, and through our commitment to using recyclable materials for product packing and shipping. In addition, we use a kiln to fuse our glass tiles, rather than a furnace, which uses more energy and produces harmful emissions.

We have established and continue to develop our reputation for artistic and innovative, hand-crafted recycled glass tiles, sold at a competitive price for use in the home-improvement and green building industries. We are proud to treat customers and the community with a reputation of professionalism, expertise and environmental consciousness.

Our tile is proudly made
in Portland, Oregon, U.S.A.

Product Contribution Towards LEED Certification:

MRc4.1 and MRc4.2

Stardust Glass uses pre-consumer recycled glass for all of our tile products. Listed below is the recycled content by weight of tile for each color:

87% Pre-Consumer

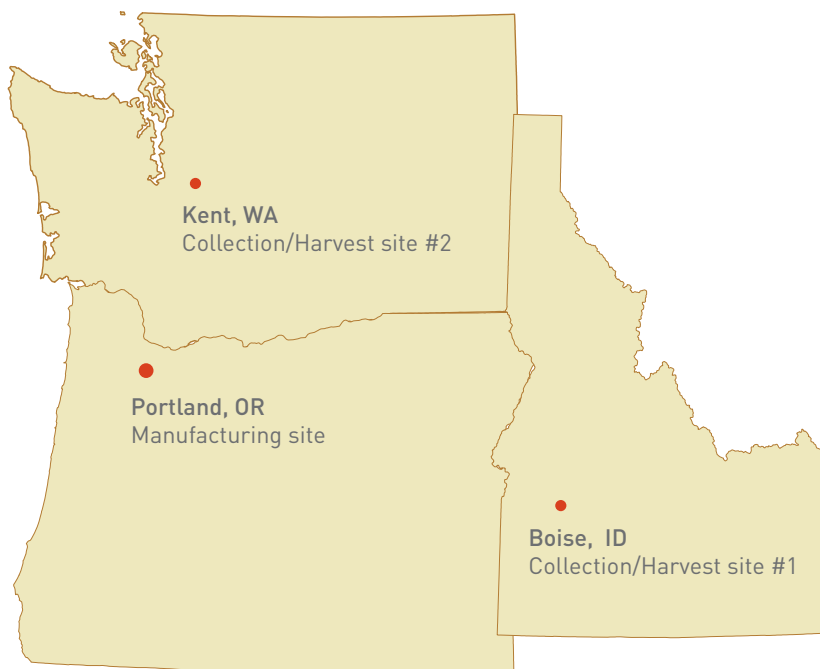

Emerald
Lava
Mercury Red
Moss
Ultra Red
Rum
Spritzer

97% Pre-Consumer

All other colors
(see color palette)

MRc5.1 and MRc5.2

All pre-consumer recycled glass used in our products is collected and harvested within 250-500 miles of our manufacturing site in Portland, OR.
